Malaysia: Preliminary Decision to Make ODF An Official Standard

Malaysia's standards body voted to propose ODF as a country standard, following the recognition in May by ISO of ODF as an international standard. After a public comment period that ends in October, Malaysia's Ministry of Science, Technology and Innovation is expected to formally endorse ODF by year's end, recommending the format for use by the public sector.

Spain: Region of Extremadura Requires ODF and PDF for Use by Public Officials

The Spanish region of Extremadura, which will move its entire administration to Linux and open source software before the end of year, has decided to make it a requirement that officials use ODF and PDF formats for all documents. The measure will be implemented within the next year.

Germany: ODF Under Review for Use By Federal Government

Standards and Architectures for e-Government Applications (SAGA) is a multi-vendor expert group that recommends standards to be used by the German federal government. SAGA Version 2.1, published by the Federal Ministry of the Interior, was issued in December 2003 and version 3.0, which includes reference to ODF, is currently under final review. Though direct participation in the final review of Version 3.0 is limited to members of the SAGA expert group, anybody can provide comments and feedback in the public forum that has been established for this purpose.

Software Freedom Law Center Declares ODF Free and Open

The Software Freedom Law Center has issued an opinion that ODF is free of legal encumbrances that would prevent its use in free and open source software, as distributed under licenses authored by Apache and the Free Software Foundation (FSF).

What Is Open Document? New Resource Now Available

Sam Hiser of the OpenDocument Foundation has put together an excellent new resource document that takes a detailed look at this new standard, how it implements XML for office documents, the technical and political wranglings in the standard, available tools, applications that offer ODF support, who's implementing ODF, and more.

ODF v1.1 Now Available for Public Review

OASIS has announced that the 60-day public review period for ODF v1.1, which incorporates the recommended changes from the OASIS subcommittee to address accessibility concerns, will run from 27 July through 25 September 2006, after which a second draft may be published. Any interested party can review the public draft and provide comments.
